Foot Operated Door Opener

Part#: 20200327

Open doors when your hands are full and increase accessibility in your facility. SylvanSport foot operated door opener works on latch-less commercial wood or metal doors. Reduces the spread of germs, helps to prevent cross-contamination.

Kit contains (one) 12 ga. powder coated steel Footplate and (five) #10 x 1 1/2" Mounting Screws

Position Footplate at the lower corner, on "pull" side of door and mark hole locations.

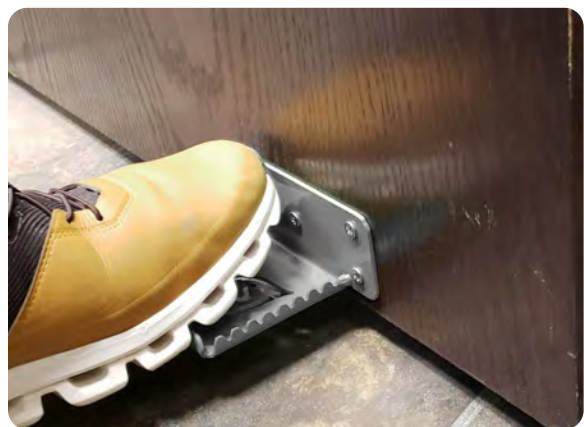

Using a 1/8" drill bit, drill (three) starter holes for the #10 Mounting Screws.

Starting with the center hole, drive the (three) #10 Mounting Screws into door.

Final completed installation.

To operate, simply Position foot on top of Footplate and pull toward you.
